Level 2 securities primarily include United States government securities, corporate securities, securities from states, municipalities and political subdivisions, mortgage-backed securities and certain other asset-backed securities. For securities not actively traded, the pricing services may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds. The Company has controls in place to review the pricing services' qualifications and procedures used to determine fair values.
